

# Astro-Online Quick Install

A quick installation for the impatient...

1. Download AstroOnline.war

<http://astro-online.sourceforge.net/>

2. Create MySQL database "astroshare\_astroonline"

```
create database astroshare_astroonline;
```

3. Create MySQL user "astroshare" with password "astroonline"

```
grant select, insert, update, delete, create, drop, alter on  
astroshare_astroonline.*  
to 'astroshare'@'localhost' identified by 'astroonline';
```

*NOTE If your database resides on a different server, you'll need to change "localhost" to the ip address (or domainname) of your application server.*

4. Deploy AstroOnline.war and perform application installation

Copy the war file to the relevant directory, open the following page in your browser, and follow the instructions on the screen:

<http://your-server:your-port/your-Astro-Online-path/install>

5. Check installation and add your own design

After opening the following page in your browser, the Astro-Online home-page should appear on your screen.

<http://your-server:your-port/your-Astro-Online-path/>

Please, check the installation guide for more information!

Good luck and have fun!  
Peter Schulz, Astro Share
